- P21 PRESS SHUTTER BUTTON OF CAMERA
P22 CAPTURE IMAGE FILE FROM CAMERA AND CHANGE FILE NAME
P23 RECORD IMAGE FILE NAME IN DATABASE
P24 PRINT PERSONAL INFORMATION AND IMAGE ON CARD, SIMULTANEOUSLY READ ID NUMBER OF ELECTRONIC TAG, AND RECORD ID NUMBER IN DATABASE
OS OPERATION SYSTEM

BB IMAGE FILE COPYING
CC RECORDING OF IMAGE FILE NAME IN DATABASE

(57) Abstract: To issue an RFID card, only two steps are manually executed and three steps are executed under software control. The two manually executed steps are a step of entering personal information on the person to possess the RFID card and registering the personal information in a database and a step of pressing the shutter button of a camera (CAM) to capture an image. The steps under software control are a step of copying an image file from the camera (CAM) to a computer (COM4), changing the name of the image file to another one, recording the name in a database and relates the name to the personal information, a step of printing the image file and the personal information on a new card (NC), and a step of reading the ID number from the inlet attached to the back of the new card (NC) during the printing, recording the ID number in the database, and a step of relating the ID number to the personal information and the image file. Thus, the time required to issue an RFID card (IDC) can be shortened, and the issuance processing of RFID card (IDC) can be simplified.
